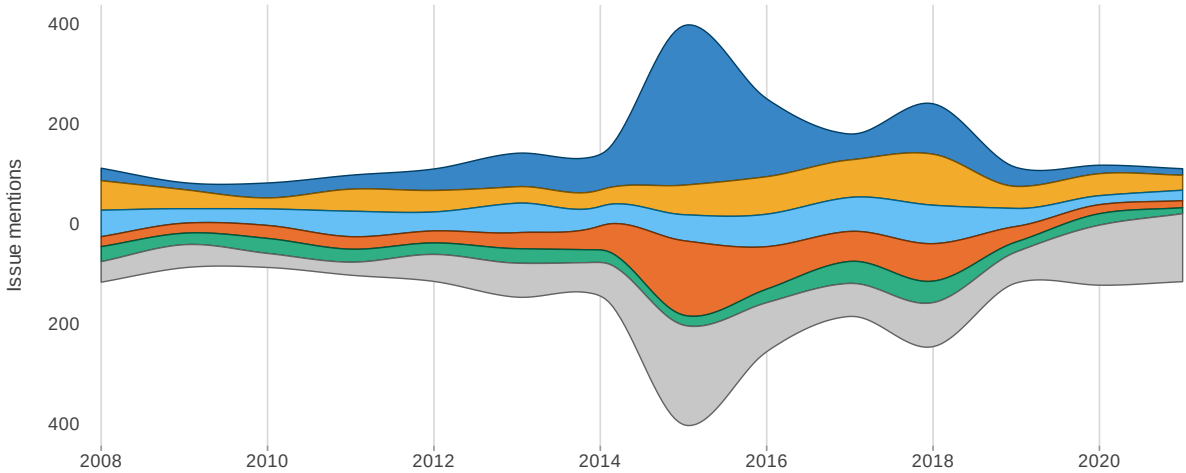
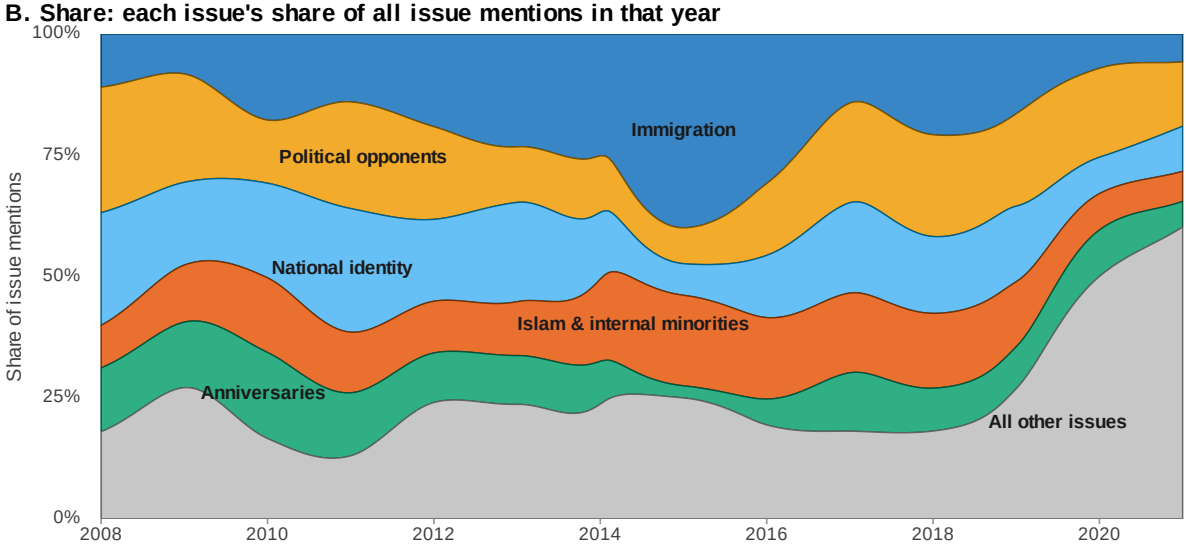
Issue focus of far-right protest events in six European countries, 2008–2021

A. Frequency: issue mentions per year

Stream width = number of issue mentions in that year



B. Share: each issue's share of all issue mentions in that year



Note: Austria, Germany, the Netherlands, Poland, Spain and Sweden combined; 2,523 events with 4,415 issue mentions (each event can raise up to thr
The five issues are those mentioned most often over 2008–2021; ranking on the first-listed issue alone gives the same five. Issue labels as coded in the
The grey band is large in 2015 mainly because of 'Economy & welfare' (22% of that year's mentions) and in 2020–2021 because of 'Other' and 'Health'.
Streams interpolate the yearly values with a monotone spline and pass through every yearly value.
